

HEALTH & SAFETY GENERAL STATEMENT

Sporting Chance Project Ltd (SCP) recognises its responsibilities for the health, safety and welfare of staff and others affected by its activities, including children and young people (CYP), visitors, contractors and members of the public. We will identify hazards, assess risks and eliminate them where reasonably practicable or otherwise control them effectively.

Effective health and safety management is integral to safeguarding CYP. As a non-school Alternative Learning Provider, SCP will co-operate with commissioning schools, local authorities, parents/carers, premises controllers and relevant professionals, and will follow its Child Protection & Safeguarding Policy and Keeping Children Safe in Education 2026 where relevant to its provision.

Managers and supervisors must take reasonable precautions to protect the health, safety and welfare of the workforce and anyone else who may be affected by SCP's activities. Environments, equipment, transport, off-site provision and activities must be appropriately assessed and managed. Individual medical, SEND, communication and safeguarding needs will be considered, with reasonable adjustments made where required.

SCP will provide and maintain a safe and healthy working environment, so far as is reasonably practicable, in accordance with the Health and Safety at Work etc. Act 1974 and the Management of Health and Safety at Work Regulations 1999. Other relevant requirements, including workplace welfare, COSHH, first aid, fire safety and RIDDOR, will be followed as applicable. SCP will achieve this by:

- providing leadership, competent advice and adequate resources;
- completing and reviewing suitable and sufficient risk assessments;
- consulting employees on matters affecting their health and safety;
- providing safe premises, access, equipment and systems of work;
- ensuring substances are handled and used safely;
- maintaining suitable fire, evacuation, first-aid and emergency arrangements, including Personal Emergency Evacuation Plans where required;
- providing accessible information, instruction, training and supervision;
- ensuring workers are competent for their duties;
- preventing accidents and work-related ill health;
- recording, investigating and reporting accidents, near misses and dangerous occurrences as required; and
- reviewing health and safety performance and arrangements at least annually and following significant incidents or material change.

SCP will exchange relevant risk information and co-operate with other employers, contractors and premises controllers where activities overlap. Employees and other workers must take reasonable care of themselves and others, follow training and procedures, use equipment correctly and report hazards, defects, incidents and unsafe practice promptly.

Any health, safety or welfare concern indicating that a child may be suffering or at risk of harm must also be reported without delay to the Designated Safeguarding Lead (DSL), Tony Ricketts, or, if he is unavailable, to a Deputy DSL, Sharon Galton or Jordan Ricketts. Immediate danger must be addressed through the emergency services where required and must not await an internal report.

These responsibilities will be explained at induction and reinforced through relevant SCP policies, procedures, risk assessments, training and supervision.
